

Substrate Wetting Agent DCA-287

dcachem.com/portfolio/substrate-wetting-agent-dca-287ed

Introduction

DCA-287 is an anionic surfactant. It could decrease both dynamic surface tension and static surface tension without any influence on the recoat ability.

Physicochemical Data

- Chemical composition: anionic surfactant
- Appearance: Light yellow viscous solution
- Active content: 70%
- Solvent: water/alcohol

Product features

- Good leveling ability
- Excellent wetting
- Anti crater
- Good compatibility
- Good recoat ability

Application areas

DCA-287 is suitable for water based system

- Water-based wood coatings
- Water-based industrial coatings

Similar Products: DO-75, OT-75

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation

Packaging and storage:

25KG plastic drum, stored in a cool and dry place.
