

Dispersing agent DCA-5315

 dcachem.com/portfolio/dispersing-agent-dca-5315

Introduction

DCA-5315 is a copolymeric dispersant with controlled flocculating wetting and dispersing ability. It has good compatibility with many kinds of resin, suitable for inorganic pigments with good anti-setting performance.

Physicochemical Data

- Chemical composition: Copolymer with pigment affinity group
- Appearance: Yellow transparent solution
- Active content: 50%
- Solvent: solvent naphtha

Product features

- DCA-5315 is suitable for all kinds of pigment dispersion in solvent borne coating systems, especially for leather color paste and with good compatibility.
- DCA-5315 is a polymeric dispersant with good anti-setting and excellent store stability.

Application areas

DCA-5315 is recommended to use in solvent borne **leather and synthetic leather** coating systems.

Similar Products: BYK-204

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Usually, it should be charged before the grind stage during the produce, with **5%** to **10%** to inorganic pigment

Packaging and storage:

25KG iron drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
