

Silicone Antifoam Agent DCA-361W

 dcachem.com

Introduction

DCA-361W is an organic silicone defoamer optimized for water-based systems, known for its strong defoaming and foam-suppressing abilities. It is highly effective even at very low addition levels, making it suitable for use in water-based paints and inks.

Physicochemical Data

- Chemical composition: Organic Silicone Compound
- Appearance: White Emulsion
- Active content: 50%
- Solvent: Water

Product features

- **Potent Defoaming Action:** Delivers strong foam suppression with minimal addition
- **Efficient Performance:** High efficiency in defoaming, providing optimal results with low dosages.
- **Easily Dispersible:** Formulated for easy dispersion in water-based systems.

Application areas

Applicable for various water-based paints and ink systems.

Similar Products: DC-65

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Generally, 0.05-1% of the total amount, can be added at any stage of production, followed by thorough stirring for optimal dispersion.

Packaging and storage:

25kg Plastic Drum, stored in a cool and dry place.
