

Silicone Antifoam DCA-339W

 dcachem.com/portfolio/silicone-antifoam-dca-339w

Introduction

DCA-339W is a self-emulsifying organic silicone defoamer suitable for water-based systems, known for its strong defoaming and foam-suppressing abilities, along with high safety in use

Physicochemical Data

- Chemical composition: Modified Organic Polysiloxane Compound
- Appearance: Light Yellow Viscous Liquid
- Active content: 100%
- Solvent: None

Product features

- **Strong Defoaming Ability:** Rapidly eliminates foam in water-based systems.
- **High Efficiency:** Effective at low dosages for optimal performance.
- **Safe for Use:** Ensures high usage safety in various applications.

Application areas

Suitable for a variety of water-based systems.

Similar Products: BYK-028

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Generally, 0.05-1% of the total amount, to be added during the grinding stage, followed by thorough stirring for optimal dispersion.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
