

Silicone Defoamer DCA-3936

 dcachem.com

Introduction

DCA-3936 is an organic silicone emulsion as defoamer for water base systems. It has good antifoam ability at low dosage. It is easy to disperse and has a low possibility to cause crater.

Physicochemical Data

- Chemical composition: Modified silicone
- Appearance: White emulsion
- Active content: 20%
- Solvent: Water

Product features

- DCA-3936 has good antifoam ability at low dosage
- DCA-3936 has a low possibility to cause crater
- Designed for easy dispersion in water-based systems

Application areas

DCA-3936 is recommended to use in the water borne coating systems

Addition Method

Usually, it should be charged at the lapping stage during the produce with 0.05% to 1.0% dosage to gross.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
