

# Adhesion Promoter DCA-7063

[dcachem.com/portfolio/adhesion-promoter-dca-7063](http://dcachem.com/portfolio/adhesion-promoter-dca-7063)

## Introduction

DCA-7063 is a modified polyester. It is suitable for melamine baking system which can enhance the adhesion between the paint film and the metal substrate. DCA-7063 has good compatibility with melamine resin systems.

## Physicochemical Data

- Chemical composition: Special polyester
- Appearance: Colorless viscous transparent liquid
- Active content: 60%
- Solvent: 2-Butoxyethanol

## Product features

- DCA-7063 improves the adhesion of the coating film to various difficult-to-adhere metals such as aluminum, zinc, stainless steel, and electroplating surfaces.
- DCA-7063 increases the flexibility and impact resistance of the coating film.
- DCA-7063 does not change color during high-temperature baking.

## Application areas

DCA-7063 is recommended to use in the melamine and PU systems.

## Similar Products: Lubrizol-2063

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

## Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-5.0% of the total formulation

## Packaging and storage:

25KG plastic pail, stored in a cool and dry place.
