

Adhesion Promoter DCA-7562

dcachem.com/portfolio/adhesion-promoter-dca-7562

Introduction

DCA-7562 is a modified polymer with acid group. It is suitable for melamine baking system which can enhance the adhesion between the paint film and the metal substrate. DCA-7562 has good compatibility with melamine resin systems.

Physicochemical Data

- Chemical composition: Special polyester compound
- Appearance: light yellow viscous liquid
- Active content: 80%
- Solvent: Di(propylene glycol) methyl ether

Product features

- DCA-7562 is suitable for solvent melamine baking system to metal substrate
- DCA-7562 has good compatibility to melamine resins.

Application areas

DCA-7562 is recommended to use in the melamine and PU systems.

Similar Products: BYK-4510

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

The recommended dosage is between 0.1% and 5%, and it can be added before or after other components.

Packaging and storage:

25KG plastic drum, stored in a cool and dry place.
