

Silicone Antifoam DCA-4058

dcachem.com/portfolio/silicone-antifoam-dca-4058

Introduction

DCA-4058 is an organic silicone defoamer for solvent-based systems, which can quickly break the bubbles generated during the production of coatings, while having excellent compatibility and safety during use.

Physicochemical Data

- Chemical composition: Defoaming organic silicone and non-silicone polymer solution
- Appearance: Colorless transparent solution
- Active content: $\leq 3\%$
- Solvent: Aliphatic hydrocarbon solvent

Product features

- Excellent defoaming capability and quick bubble breaking
- Excellent compatibility, does not cause system turbidity, and does not affect gloss
- Helps eliminate defects such as fisheyes, pinholes, craters, and dark bubbles in the coating film.

Application areas

Suitable for various solvent-based coating systems, including but not limited to the following application areas:

- Solvant system
- UV-curable systems
- Epoxy system

Similar Products: BYK-088

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Generally, 0.1-1% of the total amount can be added at any stage of production.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
