## Silicone Free Leveling Agent DCA-250

### Introduction

DCA-254N is a general-purpose non-silicone leveling agent with outstanding leveling performance and defoaming ability. It also offers an extremely high cost-performance ratio and is widely applicable to various general-purpose coatings. Compatibility testing is required when used with clear coats.

### Physicochemical Data

- Chemical composition: Acrylic copolymer solution
- Appearance: Colorless transparent solution
- Active content: 50%
- Solvent: Xylene

### Product features

- Good compatibility properties in solvent-based systems
- Excellent final leveling effect and defoaming ability.
- Preventing shrinkage and fisheye formation
- Reduces the surface tension of the paint film, greatly enhancing the wetting ability of the paint on the substrate

### Application areas

DCA-254N is suitable for alkyd, acrylic, amino-baking, polyurethane, and other solvent-based and solvent-free systems.

### Similar Products: BYK-354

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

### Addition Method

It can be added at any stage of production,

Recommended dosage: 0.1-1.0% of the total formulation, generally 0.2-0.5% of the total formulation in most cases.

### **Packaging and storage:**

25KG iron drum, stored in a cool and dry place.
