

Silicone Free Leveling Agent DCA-261

dcachem.com/portfolio/silicone-free-leveling-agent-dca-261

Introduction

DCA-261 is a modified acrylic leveling agent. Compared with traditional non-silicone leveling agents, DCA-261 has excellent compatibility in various general resin systems. It ensures clear and haze-free coating films in glossy systems while providing outstanding leveling performance and a certain degree of substrate wetting properties.

Physicochemical Data

- Chemical composition: Modified acrylate compound (without organosilicon)
- Appearance: Colorless transparent viscous solution
- Active content: 100%
- Solvent: None

Product features

- Exceptional compatibility, suitable for high-gloss and high-compatibility systems, ensuring clear and haze-free coating films.
- Excellent leveling properties, which can achieve a mirror-like effect

Application areas

Suitable for various solvent-based coating systems, including but not limited to the following application areas:

- Wood coatings for various resin systems
- Thermoplastic resin systems, such as thermoplastic acrylic resins, nitrocellulose lacquers, etc.
- UV curable systems

Similar Products: BYK-361N

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation, generally 0.2-0.5% of the total formulation in most cases.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
