

Silicone Free Leveling Agent DCA-2750

dcachem.com/portfolio/silicone-free-leveling-agent-dca-2750

Introduction

DCA-2750 is a general-purpose non-silicone leveling agent that performs well in terms of compatibility, leveling, defoaming, and substrate wetting. It also offers a high cost-performance ratio and is widely applicable to various general-purpose coatings.

Physicochemical Data

- Chemical composition: Acrylic copolymer solution
- Appearance: Colorless transparent solution
- Active content: 50%
- Solvent: Mixed aromatic hydrocarbons

Product features

- DCA-2750 exhibits good compatibility and leveling properties in solvent-based systems, preventing the formation of shrinkage holes and fisheyes.
- DCA-2750 has broad applicability and is suitable for various solvent-based systems.

Application areas

Used in solvent-based and solvent-free systems such as alkyd, acrylic, amino baking, and polyurethane.

Addition Method

It can be added at any stage of production,

Recommended dosage: 0.1-1.0% of the total formulation, generally 0.2-0.5% of the total formulation in most cases.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
