

Silicone Leveling agent DCA-1232

dcachem.com/portfolio/silicone-leveling-agent-dca-1232

Introduction

DCA-1232 is a modified organosilicon compound with acrylic acid double bonds, which has excellent compatibility and leveling ability, good hand feel, and is particularly suitable for UV curing systems. It can also be used in water-based and solvent-based coating systems to provide a permanent feel.

Physicochemical Data

- Chemical composition: Organic modified silicone oil
- Appearance: Yellow transparent liquid
- Active content: 100%
- Solvent: None

Product features

- Excellent compatibility
- Excellent leveling ability
- Good feel
- The last film without recoatability

Application areas

DCA-1232 can be widely used in various water-based and solvent-based coating systems :

- UV curing systems
- Water-based industrial coatings
- UV curable coatings, ink and other systems.

Similar Products: Tego-2200N

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation, generally 0.3-0.8% of the total formulation in most cases.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
