

Silicone Leveling agent DCA-133

dcachem.com/portfolio/silicone-leveling-agent-dca-133

Introduction

DCA-133 is a polyether-modified silicone compound with wide applicability and excellent compatibility with various resin systems. It has good flow leveling properties, excellent feel, strong matting direction ability, and strong anti-shrinkage ability, making it an excellent organic silicone leveling agent with outstanding performance in all aspects. This product does not affect recoatability.

Physicochemical Data

- Chemical composition: Polyether-modified silicone oil
- Appearance: Light yellow viscous solution
- Active content: 100%
- Solvent: None

Product features

- Good compatibility, able to be well compatible with various common resins
- Wide applicability, suitable for various systems
- Excellent feel
- Outstanding flow leveling properties
- Excellent anti-shrinkage performance

Application areas

Suitable for various solvent-based coating systems, including but not limited to the following application areas:

- Wood coatings for various resin systems
- Industrial coatings of various resin systems
- UV curing systems
- Water-based resin systems

Similar Products: BYK-333

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production, and adding it during the dispersion stage helps with pigment wetting.

Recommended dosage: 0.1-1.0% of the total formulation, generally 0.2-0.5% of the total formulation in most cases.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
