

Silicone Leveling agent DCA-1373

dcachem.com/portfolio/silicone-leveling-agent-dca-1373

Introduction

DCA-1373 is a polyether-modified organosilicon compound with excellent quick leveling ability due to its small molecular weight, without compromising re-coatability. It also has outstanding substrate wetting ability and good compatibility with most resin systems. DCA-1373 is particularly suitable for UV-curable systems, improving the feel and wear resistance of the paint film.

Physicochemical Data

- Chemical composition: Polyether-modified silicone oil.
- Appearance: Light yellow transparent liquid
- Active content: 100%
- Solvent: None

Product features

- Excellent leveling ability
- Help for defoaming
- Not effect recoatability
- Good compatibility with various resins
- Anti-cratering properties

Application areas

DCA-1373 can be used in all solvent-based systems, water-based systems, and UV-curable systems, etc.

Similar Products: BYK-UV3510

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
