

Silicone Leveling agent DCA-1402

dcachem.com/portfolio/silicone-leveling-agent-dca-1402

Introduction

DCA-1402 is a silicone emulsion formed by high molecular weight polysiloxane in water and is suitable for various water-based coatings and ink systems. DCA-1402 can greatly improve the tactile feel, wear resistance, and anti-sticking effect of water-based coatings and inks.

Physicochemical Data

- Chemical composition: High molecular weight silicone emulsion
- Appearance: White emulsion
- Active content: 55%
- Solvent: Water

Product features

- Good feel
- Anti-stick
- Wear resistance

Application areas

DCA-1402 is particularly suitable for water-based coatings, inks, and other systems.

Similar Products: Tego-482

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation, generally 0.3-0.8% of the total formulation in most cases.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
