

Silicone free Leveling agent DCA-255

dcachem.com/portfolio/silicone-free-leveling-agent-dca-255

Introduction

DCA-255 is an acrylic ester copolymer suitable for various solvent-based and water-based systems. It has good compatibility and, while improving leveling effect, it can increase the surface tension of the final coating film and enhance the wetting effect after recoating.

Physicochemical Data

- Chemical composition: Acrylic ester copolymer
- Appearance: Colorless to light yellow viscous transparent liquid
- Active content: 100%
- Solvent: None

Product features

- DCA-255 has good compatibility and leveling properties in solvent-based systems.
- DCA-255 can increase the surface tension of the final coating film.
- DCA-255 can improve the substrate wetting properties

Application areas

Used in various solvent-based and water-based coating systems.

Similar Products: BYK-356

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation, generally 0.3-0.8% of the total formulation in most cases.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
