

Silicone free Leveling agent DCA-2903

dcachem.com/portfolio/silicone-free-leveling-agent-dca-2903

Introduction

DCA-2903 is an acrylic ester copolymer suitable for various solvent-based and water-based systems. It exhibits good compatibility and improves leveling. Additionally, it increases the surface tension of the final paint film and enhances wetting after recoating.

Physicochemical Data

- Chemical composition: Acrylic ester copolymer
- Appearance: Colorless to pale yellow viscous transparent liquid
- Active content: 100%
- Solvent: None

Product features

- DCA-2903 demonstrates good compatibility and leveling in solvent-based systems.
- DCA-2903 increases the surface tension of the final paint film, enhance wetting after recoating

Application areas

Suitable for water-based coating systems, solvent system and UV curable system.

Similar Products: BYK-3560

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

It can be added at any stage of production

Recommended dosage: 0.1-1.0% of the total formulation, generally 0.3-0.8% of the total formulation in most cases.

Packaging and storage:

25KG iron drum, stored in a cool and dry place.
