

Silicone Leveling agent DCA-191W

 dcachem.com/portfolio/silicone-leveling-agent-dca-191w

Introduction

DCA-191W is a trace fluorosilicone modified acrylic ester copolymer leveling agent, specifically designed for waterborne systems. It offers excellent compatibility and leveling properties, quick action, and also provides outstanding shrinkage hole prevention capabilities.

Physicochemical Data

- Chemical composition: Acrylic ester copolymer
- Appearance: Light yellow transparent solution
- Active content: 50%
- Solvent: Propylene glycol monomethyl ether

Product features

- DCA-191W has good compatibility and leveling properties in solvent-based systems.
- DCA-191W has strong substrate wetting capabilities.
- DCA-191W is particularly suitable for waterborne baking paint systems.

Application areas

Used in alkyd, acrylic, amino baking paint, polyurethane and other solvent-based and waterborne systems.

Similar Products: Tego-500

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Typically 0.1-1% of the total amount, can be added at any stage of the production process.

Packaging and storage:

25kg plastic drum
