Silicone free Defoamer DCA-4191

dcachem.com/portfolio/silicone-free-defoamer-dca-4191

Introduction

DCA-4191 is a mineral oil defoamer for water based systems. It has strong defoaming ability and it is easy to introduce

Physicochemical Data

• Chemical composition: Mineral oil emulsion

Appearance: White emulsion

• Active content: 60%

Solvent:Water

Product features

- DCA-4191 defoamer is suit for water based system
- Excellent defoaming capability

Application areas

DCA-4191 is suit for water based system.

Addition Method

DCA-4191 should be charged at the lapping stage during the produce with 0.05% to 1.0% dosage to gross

Packaging and storage:

25KG plastic drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
