

# Silicone Defoamer DCA-3128

---

 [dcachem.com](http://dcachem.com)

## Introduction

---

DCA-3128 is an organic silicone defoamer for water-based systems. It has strong defoaming ability with low dosage. It should be introduced in the grinding stage.

## Physicochemical Data

---

- Chemical composition: Modified silicone
- Appearance: light yellow viscous liquid
- Active content: 100%
- Solvent: None

## Product features

---

- **DCA-3128 defoamer** is suitable for water-based systems with good compatibility
- **DCA-3128 defoamer** has good defoaming ability

## Application areas

---

**DCA-3128** is recommended for use in water-borne coating systems.

## Addition Method

---

Usually, it should be charged at the lapping stage during the production with **0.05% to 1.0%** dosage to gross

## Packaging and storage:

---

25kg plastic pail., stored in a cool and dry place.

**Note:** The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
