

Silicone Defoamer DCA-3474

 dcachem.com

Introduction

DCA-3474 is a organic silicone defoamer for water based systems. It has strong defoaming ability with low dosage. It should be introduced in grinding stage.

Physicochemical Data

- Chemical composition: Modified silicone
- Appearance: light yellow viscous liquid
- Active content: 100%
- Solvent: None

Product features

- **DCA-3474 defoamer** is suit for water based system with good compatibility
- **DCA-3474 defoamer** is very suitable for the manufacture of pigment paste.

Application areas

DCA-3474 is recommended for use in water-borne coating systems.

Addition Method

Usually, it should be charged at the lapping stage during the produce with **0.1%** to **1.0%** dosage to gross

Packaging and storage:

25kg plastic pail., stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
