

Dispersing agent DCA-F6072

 dcachem.com/portfolio/dispersing-agent-dca-f6072

Introduction

DCA-F6072 is a dispersant special designed for putty. It has excellent wetting ability for inorganic pigments and supply good anti-setting property

Physicochemical Data

- Chemical composition: Polycarboxylic acid amine salt
- Appearance: Yellow transparent liquid
- Active content: 50%
- Solvent: Propylene glycol

Product features

- DCA-F6072 is suitable for middle-polar systems and has excellent compatibility with many kinds of resins.
- DCA-F6072 could decrease the mill viscosity and it could supply good anti-setting

Application areas

DCA-F6072 is recommended to use in solvent borne coating systems

Addition Method

Usually, it should be charged before the grind stage during the produce, with **1%** to **2%** to inorganic pigment, with **5%** to **20%** to **bentonite**.

Packaging and storage:

25KG plastic pail, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
