

Dispersant DCA-F5214

 dcachem.com/portfolio/dispersant-dca-f5214

Introduction

DCA-F5214 is a copolymeric dispersant with controlled flocculating wetting and dispersing ability.

It has good compatibility with many kinds of resin, suitable for inorganic pigments with good anti-setting performance.

Physicochemical Data

- Chemical composition: Copolymer with pigment affinity group
- Appearance: Yellow transparent liquid
- Active content: 50%
- Solvent: Mixed aromatic solvent

Product features

- DCA-F5214 is suitable for all kinds of pigment dispersion in solvent borne coating systems, especially for leather color paste and with good compatibility
- DCA-F5214 is a polymeric dispersant with good anti-setting and excellent store stability

Application areas

DCA-F5214 is recommended to use in solvent borne coating systems.

Addition Method

Usually, it should be charged before the grind stage during the produce, with 5% to 10% to inorganic pigment

Packaging and storage:

25KG plastic pail, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct

preliminary tests to assess its suitability.
