

Silicone Free Defoamer DCA-423W

 dcachem.com

Introduction

DCA-423W is a non-silicone defoamer specially designed for water-based coating systems. It possesses strong defoaming and anti-foaming capabilities without affecting recoatability or causing adverse effects on the system.

Physicochemical Data

- Chemical composition: Non-silicone polymer
- Appearance: Light yellow viscous liquid
- Active content: 100%
- Solvent:None

Product features

- Excellent compatibility
- Not effect gloss
- Good recoatability

Application areas

DCA-423W suitable for water-based systems, solvent-based systems

Similar Products: BYK-012

Our products have a good cost-performance ratio, receiving positive feedback from customers in China and overseas markets.

Addition Method

Add 0.3% to 1.0% of the total amount and test for the optimal dosage. Ensure thorough mixing with sufficient shear force after addition, preferably before grinding.

The dosage may vary based on different application systems and can be added at any stage of production.

Packaging and storage:

25KG plastic drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
