

# Adhesion Promoter DCA-7175

---

 [dcachem.com/portfolio/adhesion-promoter-dca-7175](https://dcachem.com/portfolio/adhesion-promoter-dca-7175)

## Introduction

---

DCA-7175 is a modified polyester for water-based systems. It is suitable for melamine baking system which can enhance the adhesion between the paint film and the metal substrate. DCA-7175 has good compatibility with melamine resin systems.

## Physicochemical Data

---

- Chemical composition: Special polyester
- Appearance: Colorless viscous transparent liquid
- Active content: 60%
- Solvent: 2-Butoxyethanol

## Product features

---

- DCA-7175 adhesion promoter is suitable for water melamine baking system to metal substrate
- Has good compatibility to melamine resins.

## Application areas

---

DCA-7175 is recommended to use in the melamine and PU systems.

## Addition Method

---

It can be added at any stage of production

Recommended dosage: 0.1-5.0% of the total formulation

## Packaging and storage:

---

25KG plastic pail, stored in a cool and dry place.

**Note:** The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
