

Silicone free Leveling agent DCA-148N

 dcachem.com/portfolio/silicone-free-leveling-agent-dca-148n

Introduction

DCA-148N is fluorocarbon modified acrylic copolymer leveling agent. DCA-148N has the excellent leveling performance, fast leveling speed. DCA-148N can decrease the surface tension on the paint film so as to good anti-crater ability

Physicochemical Data

- Chemical composition: Fluorinated acrylic copolymer
- Appearance: Colorless transparent liquid
- Active content: 70%
- Solvent: mixed ester

Product features

- DCA-148N has good compatibility, good leveling in solvent system
- DCA-148N can decrease the surface tension on the paint film and improve the substrate wetting.

Application areas

DCA-148N is recommended to used in solvent and solvent-free systems such as alkyd, acrylic acid, amino baking.

Addition Method

For best results, a dosage of 0.1-1% of the total amount is recommended, which can be added at any stage of the production process.

Packaging and storage:

25KG plastic pail, stored in a cool and dry place.
