

Anti-gelling Agent DCA-F8125

 dcachem.com/portfolio/anti-gelling-agent-dca-f8125

Introduction

DCA-F8125 prevents an increase in viscosity in air-drying and baking coatings and prevents gelling in long-term storage. It can inhibit skin formation in oxidative-drying systems and prevents the thickening of acidic binders with basic pigments

Physicochemical Data

- Chemical composition: mixed surfactants
- Appearance: yellow clear liquid
- Active content: 50%
- Solvent: Dipropylene Glycol Methyl Ether

Product features

- DCA-F8125 can inhibit skin formation in oxidative-drying systems
- DCA-F8125 prevents the thickening of acidic binders with basic pigments

Application areas

DCA-F8125 could be used in all water-born systems

Addition Method

The recommended amount is around 4-8.0%

Packaging and storage:

25KG plastic pail, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
