

Water repellent DCA-29913B

 dcachem.com/portfolio/water-repellent-dca-29913b

Introduction

DCA-29913B is a solventless silicone concentrate that is based on a mixture of silane and siloxane. It could provide excellent water-repellent for inorganic substrate and building materials

Physicochemical Data

- Chemical composition: Mixture of silane and siloxane
- Appearance: hazy liquid
- Active content: 100%
- Solvent: None

Product features

- DCA-29913B could be used as primer for inorganic substrate to supply water repellent effect.
- DCA-29913B has good depth of penetration and high resistance to alkalis

Application areas

DCA-29913B is applied in all water base industry coating systems

Addition Method

Usually, it could be charged at random stage during the produce with 1% to 5% dosage to gross.

Packaging and storage:

25KG plastic drum, stored in a cool and dry place.

Note: The purpose of this manual is to provide basic product information to technical personnel involved in the development of coatings, inks, pesticides, and other industries. It is intended for research and reference use and does not carry any warranties. Please conduct preliminary tests to assess its suitability.
